

HUTCHINS

All American ProFinishers®

The 8970 Random orbit sander is designed for Industrial and Hi-Production applications where high performance sanding and dust containment is required. With a revolutionary motor design, the 8970 delivers ultra high speed sanding with legendary Hutchins balance and durability.

Designed with a non-captive orbit, the 8970 delivers up to 30% more sanding performance and 50% faster operating speed than conventional sanders! The 8970 pictured above also shows the optional dust collection bags for ultra fine dust filtration.

Also available in Vacuum assist (model 3970) and conventional configuration (model 3570)
