

Hutchins Vacuum Swivel Upgrade

Hutchins is always striving to design sanders which increase productivity without sacrificing quality. The upgrade to the swivel port make the sander more comfortable to use and reduces vacuum hose kinking.

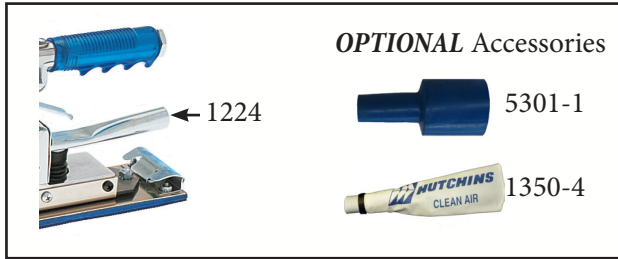

Hutchins Vacuum Models: 3950, 3960, 3970, 4920, 4932 & 4933

The vacuum-assist models 3950, 3960, 3970, 4920, 4932 & 4933 models will now be shipped with the swivel vacuum port. As many users have vacuum systems that already include vacuum hoses, the hose assembly will no longer ship with the tool. If you want to use a coaxial hose assembly, the hose assembly has been superceded by Part No. 780 which must be purchased seperately. In order to connect the tool to a vacuum hose without using the #780 Hose Assembly, please use either 5301-2 or 5301-5 vacuum connector.

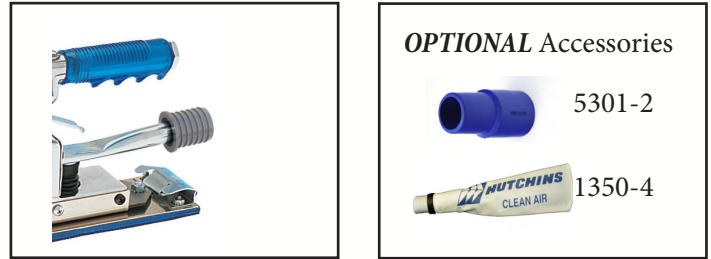

Hutchins Vacuum Models: 4920, 4932 and 4933

Old Vacuum Connections

New Vacuum Connections

The Models 4920, 4932 & 4933 have also been upgraded with the swivel vacuum port. If you choose to use the sander with a bag, you need to purchase either connector Part No. 5301-2 or connector Part No. 5301-1 and bag assembly 1350-4 depending on your model. These models can be used either with a vacuum system or as a Self-Gen (with a collection bag).

Optional Vacuum Accessories

Part No.	Description	Top ID	Top OD	Bottom ID	Bottom OD
780	Coaxial Hose Assembly for Sanders with Swivel Vacuum Connection	1 1/16"	1 1/2"	1 1/4" threaded	1 1/2"
